

## Does the integrity of the record matter to you?

The Ministry of the Attorney General (MAG) is planning disastrous changes to the current model of Court Reporting in Ontario.

**These changes will absolutely result in lower standards and a complete loss of local accountability for your transcripts.**

The integrity of the record is of the utmost importance to the Court Reporters in this courthouse who work with you on a regular basis and who produce the transcripts that you and your clients rely on.

MAG proposes to locate typing pools in eight centres across the province to produce your transcripts.

If you agree that a typist who doesn't sit in a courtroom and who may not be familiar with court procedures should not be producing the transcripts you require — we need your help.

**Please raise your concerns with your colleagues, the Ontario Bar Association and the Attorney General, Chris Bentley, before it's too late.**

Please consider signing the attached letter (or write your own letter) and send it to Chris Bentley today.
