

• lab technologists • X-ray technologists • pharmacists • psychologists • physiotherapists •

Your good health depends on us

• speech pathologists • social workers • occupational therapists • ultrasound technologists • and other health science professionals •

Ontario's Hospital Professionals are in demand around the world. Unless conditions improve, our hospitals will be faced with even more severe shortages in specialized health science fields.

The diagnostic and rehabilitative services we provide are a vital part of the care you receive. It takes more than doctors and nurses to ensure your return to good health.

Contact your MPP or local hospital board members. Tell them we need a competitive contract to ensure these services will continue.
