

PETITION

TO The Legislative Assembly of Ontario:-

WHEREAS

The Liberal government has made the decision to create 14 Local Health Integration Networks (LHINs) without consulting the people of Ontario;

And whereas these changes represent a radical shift in the manner in which health care will be delivered in the Province of Ontario;

And whereas these changes could adversely affect the long-term stability of the health care system, its users and those who serve in it;

We, the undersigned, demand that

The government place a freeze on such a transformation until all stakeholder groups and the general public are given the opportunity for meaningful input; and

The objective of any re-structuring changes must be towards creating an appropriately funded public system that is transparent, accountable, and responsive to the needs of Ontarians.
